WORK EXPERIENCE

Amazon AGI Foundations, *Applied Scientist*, New York, NY *2025.01–Present*

• Work on large-scale compute-optimal MoE model scaling and design hardware-aware performance modeling.

• Lead data preprocessing and pretraining (annealing) efforts for multilingual instructed LLM, including multi-locale data generation, filtering, reweighting, deduplication and pre-tokenization.

Bosch Center for Artificial Intelligence (BCAI), *Research Intern*, Sunnyvale, CA *2024.05–2024.08*

• Work on an algorithmic framework for automatic prompt optimization and prompt tuning with efficient prompt compression algorithm.

• Deploy prompt optimization framework with LLM to help with Bosch's internal document queries.

Visa Research, *Research Intern*, Palo Alto, CA *2023.05–2023.08*

• Design algorithms for subgraph pattern discovery within graphs composed of trillion-sized transactions.

• Implement biclique computation framework designed to efficiently handle bipartite graphs that are several orders of magnitude larger.
