## EDUCATION

Ph.D. Computer Science, Rice University, 2018-2024  
Advisor: Chris Jermaine  
B.S. Computer Science, Shanghai Jiao Tong University, 2014-2018

## RESEARCH AREAS

Data Management for Generative AI, Large Language Models, Systems for ML, Distributed ML

## INTERNSHIP

2023 Summer **Visa Research, Palo Alto, CA**

- Design algorithms for subgraph pattern discovery within graphs composed of trillion-sized transactions.
- Implement biclique computation framework designed to efficiently handle bipartite graphs that are several orders of magnitude larger.

2022 Summer **ByteDance Inc, Mountain View, CA**

- Work on self-supervised learning (SSL) on graphs and increase the accuracy of multi-view graph contrastive learning model (MVGRL) on large graph datasets (ogbn-\*) by 10%.
- Work on the scalability issues of graph diffusion by approximating personalized PageRank. Reduce the end-to-end training time by more than 60%.

2021 Summer **Jane Street, New York City, NY**

- Create efficient array data structure to index historical market data for feature selection pipeline.
- Develop adaptive quantitative investment strategies to new market conditions and optimize performance & efficiency.
