INTERNSHIP

2024 Summer **Bosch Center for Artificial Intelligence (BCAI), Sunnyvale, CA**

- Work on an algorithmic framework for automatic prompt optimization and prompt tuning with efficient prompt compression algorithm.
- Deploy prompt optimization framework with LLM to help with Bosch's internal document queries.

2023 Summer **Visa Research, Palo Alto, CA**

- Design algorithms for subgraph pattern discovery within graphs composed of trillion-sized transactions.
- Implement biclique computation framework designed to efficiently handle bipartite graphs that are several orders of magnitude larger.

2021 Summer **Jane Street, New York City, NY**

- Design transformer based model to optimize open-to-open portfolio trading returns, resulting in high returns and an elevated Sharpe ratio.
- Integrated constraints into the loss function to adapt the model for varying market conditions.
