WORK EXPERIENCE

Amazon AGI Foundations, *Member of Technical Staff*, New York, NY 2025.01–Present

- Developed hardware-aware **performance model** with roofline analysis to predict training and inference throughput across **10,000** B200 GPUs, incorporating comp-comm overlapping, 5D parallelism and **megakernels**. Boosting MFU by algorithm system co-design. (better than **xAI** 11% MFU)

- Researched novel compute-optimal **fine-grained** MoE model scaling strategy, analyzing the trade-offs between **TPP**, **MoE expert sparsity**, **loss-free load balancing**, **capacity factor** and hardware features to guide architecture design.

Bosch Center for Artificial Intelligence (BCAI), *Research Intern*, Sunnyvale, CA 2024.05–2024.08

- Work on an algorithmic framework for automatic prompt optimization and prompt tuning.
- Deploy prompt optimization framework to help with Bosch’s internal document queries.

Visa Research, *Research Intern*, Palo Alto, CA 2023.05–2023.08

- Design algorithms for subgraph pattern discovery within trillion-sized transaction graphs.
- Implement biclique computation framework designed to efficiently handle bipartite graphs.
